

COMMUNITY FOCUS

Members of the Victoria University of Wellington's Geology Society during their tour of Todd Energy's McKee Mangahewa Production Station in north Taranaki.

Kia ora koutou, and welcome to the September issue of our Todd Energy community update. The springtime weather is certainly upon us and it's fantastic to be able to enjoy a little more sunshine and warmth over the last few weeks.

I'm pleased to share that we have successfully completed the civil works at our Mangahewa D wellsite in north Taranaki as scheduled. These works are an important step for our wellsite extension project and will ensure we are well-placed to commence the drilling of up to 12 new wells.

With the wellsite expansion work now fully completed, we have also been able to successfully mobilise our Big Ben drilling rig from our Kapuni J site in south Taranaki. The rig is now stacked at the newly extended Mangahewa D site, and

we are currently planning to commence our four well drilling campaign sometime in the next 18 months. We will keep you updated on this development activity.

I do want to acknowledge our neighbours and community members for their patience and understanding during what has been a busy time on the roads in the area. Thank you for your continued support for our activities.

In south Taranaki, we've just commenced stimulation and testing operations on the three new wells drilled as part of our Kapuni J Phase 2 campaign which was successfully completed at the end of August. The current well entry operations are scheduled to run through to November, with up to 80 team members on site during this time.

On behalf of our Community team, thank you to those of you who joined us at our recent Tikorangi Consultation Forum in mid-September, and we look forward to

seeing others at our upcoming Kapuni CAG Meeting in mid-October. Planning is also underway for our open Tikorangi Community Meeting, which will be held at the Clifton Rugby Clubrooms on 21 November, and our open Kapuni Community Meeting, which will be held on 23 November – more information on this will follow over the coming weeks.

As always, if you, your friends or neighbours have any questions or concerns about our activities, please get in touch with our Todd Energy Community team on 0800 001 007.

Ngā mihi,

Our community team is here

Ongoing community commitment a key enabler

Todd Energy has confirmed its ongoing commitment to some of New Plymouth's most significant community assets, including the Todd Energy Aquatic Centre and Destination Play at Kāwaroa Park.

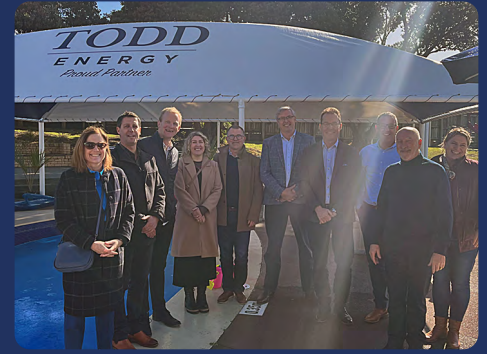

Chief Executive, Mark Macfarlane, confirmed the significant community investment directly aligned with the company's commitment to making a positive and sustainable contribution to Taranaki.

"We have been the proud naming rights partner of the Todd Energy Aquatic Centre since 2006 and we're pleased to celebrate our ongoing commitment to this partnership for a further three years. Together with the New Plymouth District Council, we're committed to ensuring this significant community asset can remain accessible to everyone in Taranaki."

Todd Energy also confirmed its support for the waterfront development Destination Play, coming on board as a Kāwaroa Partner to help bring the community project to life.

"Our sponsorship for Destination Play will help to deliver the Nature Play area of Kāwaroa Park and together, with the Taranaki Foundation, Ngāti Te Whiti and the New Plymouth District Council and NP Partners, we look forward to seeing the project commence in earnest over the coming months," says Mark Macfarlane.

New Plymouth District Council Chief Executive, Gareth Green, says the ongoing commitment from organisations like Todd Energy is a key enabler for the community.

Todd Energy offers all its staff volunteering leave! The scheme offers one day of paid leave per year so employees can offer volunteer work for a community group of charity of their choice.

Flying the Todd Energy flag at FDMC's 2023 Tradies Breakfast

Todd Energy was well-represented at this year's Tradies Breakfast, hosted by Francis Douglas Memorial College in mid-August.

The Breakfast brought together a number of FDMC Old Boys who offered some excellent advice to the 140 senior students in attendance. Todd Energy's very own Liam Bernet, an Instrument and Electrical Technician, was the event's concluding speaker, sharing his professional experiences and future goals.

Todd Energy is proud to support events like this which expose students to different career options and highlight the varied opportunities in industry trades.

Supporting our Manaia Preschool whānau

Todd Energy's Production and Maintenance team recently spent the day volunteering at Manaia Preschool, with a working bee to help get the Preschool grounds looking immaculate.

A huge amount of hard work went into the day, which was topped off with a well-deserved sausage sizzle, and the Manaia Preschool whānau were hugely appreciative of Todd Energy's support.

Supporting our communities with surplus food

Todd Energy employee, Tyler, volunteering at On The House

The incredible team from On The House have been busy supporting our communities with surplus food out of their amazing new depot and community food hub, based in Waiwhakaiho.

On The House, a charitable trust that rescues surplus food to feed people in need, has three pillars or core objectives: reduce food waste, feed people who need it, and build community through connection and participation.

Todd Energy is a proud supporter of On The House and was very pleased to have provided some of the funding required to make the new depot in Waiwhakaiho a reality. We're also very pleased to have a number of our Todd Energy employees volunteering their time to support the On The House team.

THE ENERGY INDUSTRY, EDUCATION AND TRAINING

Sharing our story with the next generation

The Victoria University of Wellington's Geology Society connects staff and students in social and academic pursuits centred on an underlying theme of geology.

Todd Energy recently hosted a number of Geology Society members in Taranaki, treating the group to a site tour covering both our main warehouse and our McKee Mangahewa Production Station (MMPS) in north Taranaki.

The students and staff were very appreciative of the learning opportunity and the hospitality provided and left with a much better understanding of Todd Energy, our operations and our role in meeting Aotearoa New Zealand's energy needs well into the future.

These opportunities are a fantastic way to help share the Todd Energy story, especially with the next generation of minds in the energy industry.

Members of the Todd Energy and Taranaki Retreat teams together at Waimanako

Creating hope with Waimanako: The Hope Centre

The team at Taranaki Retreat are all about supporting people when times are tough.

The Retreat's approach to 'humans helping humans' is brought to life not only through its residential retreat facility located on the outskirts of New Plymouth, but also through its inner-city hub, Waimanako: The Hope Centre.

Waimanako combines a creative hub, counselling support rooms, a drop-in information and support hub for individuals or whānau going through tough times, and The Gathering Café – a koha-based café

where anyone in the community can drop in for a hot drink, some warm and wholesome kai, and a safe space to breathe.

Todd Energy has been a long-standing and very proud supporter of the Taranaki Retreat for a number of years.

If you're concerned about someone who may need a bit of support with their wellbeing, or if you are that someone, please reach out to Jamie, Suzy and the incredible Taranaki Retreat team:

Celebrating success with 16 Tupu ā Nuku graduates

In mid-June, environmental workforce development programme, Tupu ā Nuku, celebrated its first student graduation.

The graduation ceremony celebrated 16 taura (students) who had been a part of the programme for two years, having signed up within Tupu ā Nuku's first month of operation. Over that time, many of the taura have completed the Tree Machine Forestry and Conservation course and today, 13 of the graduating taura are in full-time, permanent employment, which is an incredible achievement.

It is important to recognise the support of the Tupu ā Nuku team and the team from Tree Machine, who have also achieved their own success having recently been awarded the overall winner of the 2023 Primary Industries Good Employer Awards.

Congratulations to each of these awesome young people on achieving this milestone through the Tupu ā Nuku programme – ka mau te wehi!

You can find out more about the Tupu ā Nuku environmental workforce development programme by visiting: maru.nz/tupu-a-nuku-2

Understanding one of our most valuable resources

Did you know, groundwater is one of our most valuable resources?

According to the experts from the Taranaki Regional Council groundwater in Taranaki is generally stable, of relatively good quality, and subject to low and manageable levels of demand from users.

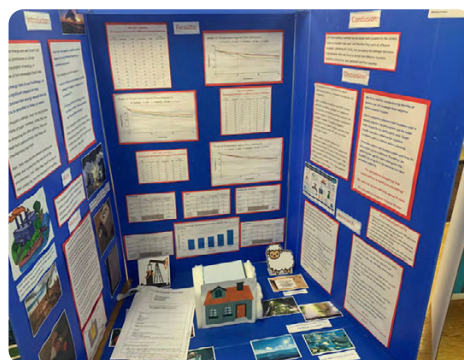

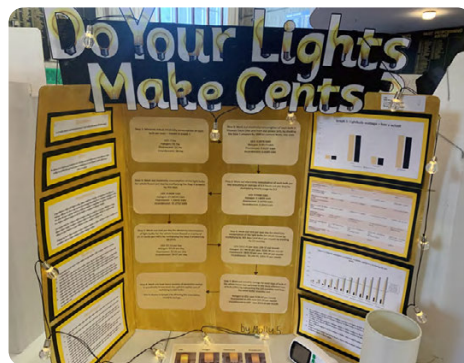

Todd Energy recently supported Taranaki Regional Council as they developed an educational tool explaining how groundwater works. Check it out at edu.trc.govt.nz/groundwater

2023 WITT Taranaki Science and Technology Fair

This year's WITT Taranaki Science & Technology Fair, held at New Plymouth Boys' High School, was a popular event with a huge number of entries from across the region.

As part of its sponsorship of the Fair, Todd Energy Senior Geophysicist, Roland Swift, acted as one of the judges – selecting two deserving entries to share the Todd Energy-sponsored special prize for an energy-related project.

Congratulations to Molly Stevenson from St Joseph's School in Opunake, who completed her project on the benefits of energy efficient light bulbs, and to Tomás Verbeek and Hugh Tien from Francis Douglas Memorial College, whose project looked at insulation.

Winning projects by Molly Stevenson (top) and Tomás Verbeek and Hugh Tien (bottom) from the WITT Science Fair

ACTIVITY UPDATE

McKee Mangaheva:

SEP: Rig move to MHWD completed

SEP: 24M MEC compression services
